Awesome Motive

Dear Hiring Manager,

I am writing to express my interest in the QA Team Lead position at **Awesome Motive**, as advertised. With over 13 years of experience in software quality assurance—including 5+ years in QA leadership roles—I bring a deep understanding of testing methodologies, team management, and automation tools that align closely with your role's responsibilities.

In my current role at Bitxia Tech Pvt. Ltd., I manage a team of 6 QA engineers and lead multiple projects across manual and automation testing. I have hands-on experience with Selenium, Cypress, TestComplete, and Ranorex, and have successfully transitioned several projects from manual to automated testing frameworks. I'm proficient in PHP, JavaScript, and React-based environments, and have also tested WordPress-based platforms and RESTful APIs including third-party integrations for payment and marketing providers.

What sets me apart is my proactive use of AI tools such as GitHub Copilot, ChatGPT, and Cursor, which I use to accelerate test script generation, perform quick research, and enhance documentation. These tools have significantly improved both the speed and quality of testing deliverables in my team.

I am particularly drawn to your organization's focus on fostering a high-performing, collaborative QA culture. My track record in mentoring junior testers, conducting regular 1:1s, and aligning QA efforts with agile development cycles will allow me to contribute effectively from day one.

I would welcome the opportunity to further discuss how my background and skills can contribute to your QA team's continued success. Thank you for considering my application.

Warm regards,

Bhuwan Agrawal
